A
Length round-trip: Bland-Altman
Difference (cm)
Mean of observed and round-trip (cm)
Mean bias: 0.106
95% LoA: [-1.547, 1.759]
B
Weight round-trip: Bland-Altman
Difference (g)
Mean of observed and round-trip (g)
Mean bias: -0.886
95% LoA: [-6.873, 5.101]
C
Length round-trip: scatter
slope = 0.953
R^2 = 0.9984
MAE = 0.665
Var ratio = 0.910
n = 35
Round-trip predicted (cm)
Observed (cm)
Ideal 1:1 line
Fit: y = 0.953x + 1.766
D
Weight round-trip: scatter
slope = 0.969
R^2 = 0.9974
MAE = 2.181
Var ratio = 0.941
n = 35
Round-trip predicted (g)
Observed (g)
Ideal 1:1 line
Fit: y = 0.969x + 0.712
